Monitoring / Follow-up Notes

Area	Instruction
Diabetes	Record fasting glucose readings. HbA1c requested at next routine follow-up.
Hypertension	Home blood pressure log requested; bring readings to next visit.
Hyperlipidemia	Repeat lipid profile at routine follow-up.
Hypothyroidism	TSH requested at routine follow-up.
Asthma	Review inhaler technique and symptom frequency at next visit.
General	Follow up in 8-12 weeks for chronic disease review.

Suggested Extraction Targets for Hakeem Testing

This document intentionally contains multiple condition-medication relationships so you can test focused Medical CV generation. Example requests after confirmation and embedding: **"Create a Diabetes-focused Medical CV"**, **"Create a Cardiology-focused Medical CV"**, or **"Create an Asthma-focused Medical CV"**. The focused CV should retrieve only the patient-approved evidence relevant to the requested condition or specialty.

Demo Prescriber Information

Clinician	Dr. Test Physician (fictional)
